CURIOUS VOYAGES through time and space

The Priests of Psi Frank Herbert

'The instant he stepped out of the transport's shields into Amel's sunlight warmth on the exit ramp Orne felt the surge of psi power around him. It was like being caught in a strange magnetic field. He caught the hand rail in sudden dizziness, stared down some two hundred metres at the glassy tricrete of the space port. Heatwaves shimmered off the glistening surface, baking the air even up to this height. There was no wind except inside him where the hidden gusts of the psi fields howled against his recently awakened senses.'

A master artist and inspired inventor, William Heath Robinson, like Frankenstein before him, gave his name to his own distinctive creations – fantastic machines, wickedly complex, all devoted to singularly ludicrous and absurd functions. Subterranean First World War lager-stealing pumps, spaghetti-stretching and denture-testing machines, devices for decoying giraffes and neatly bagging chipmunks, household contraptions for eating green peas and silencing tabby cats... all these and scores more appear in these two superb volumes of magnificent and inventive cartoonwork. *Inventions* concentrates on the infamous gadgets – over 100 bizarre pages of them – and *Absurdities* looks at both gadgets and strange pastimes. Two complementary volumes, each a goldmine of fantastic good humour.
