

A POWERFUL SF CLASSIC

THE MARTIAN CHRONICLES

Ray Bradbury

January 1999: the first manned space flight to Mars. Its ultimate goal – colonization...

This is the astonishing narrative of humanity's first contacts with the mysterious Red Planet – a profound and deeply evocative story of exploration, pioneer settlement, and ambiguous meetings with an ancient alien race.

First published in Britain as *The Silver Locusts*, this classic collection of closely interwoven stories has been placed alongside *Fahrenheit 451* as Bradbury's foremost work and most memorable contribution to the science fiction field. Recently serialised on BBC television, with Rock Hudson starring as Colonel Wilder, leader of the Zeus III Mars Expedition, *The Martian Chronicles* perfectly blends high technology and futuristic realism with all the vivid imagination and haunting artistry of Ray Bradbury at his best.

The original for the BBC TV series
