### THE FIVE DOORS

#### JACK RHYS

*'He hesitated, then forced himself forward through the screen, almost falling for he had expected some kind of resistance, but passing through it was only like passing through some visual illusion, and he found himself standing on green grass under a blue sky.'*

*'But the grass wasn't the right shade of green and the sky was an alien sky ...'*

The cylinder just appeared overnight in the Humberside field. It could have been an abandoned fuel tank of some odd design but the soft earth around it was unmarked. Besides, there was a door at one end. A door to other worlds. And other doors. But the way through those doors proved far from simple. Finding it was Gordey's job and he soon realised that the Five Doors constituted the most difficult problem that mankind had ever been set. And that the stakes were high. Very high: the whole future of the human race was on the line. 175pp
